and the second s

training and the identity of the candidate. Subject was never activated and was kept on stand-by for possible use at a later date. For that purpose bona fides were established by AMTED-1 and reported to his CO. Subject was not susplied with a MTO set and no signal plans nor pads were issued to him.

to A: [1]-1 recalls Subject was very secure in his clandestine contacts and operations. Despite established bona fides, ANIRE-1 had considerable trouble in paining Subject's confidence and three preliminary contacts were necessary before retting down to business. Subject was last contacted by ANIRE-1 at Subject's apartment described above, in January or February 1961. At this time Subject was still willing and ready to work.

O(5. It is assumed that Headquarters files on the activities of AMERD-1. AMCLEN-1 or AMFOX-1 will contain copies of the training reports and information reported by AMERD-1. We would appreciate Headquarters assistance in ascertaining Subject's identity and present whereabouts in order to determine if he could still be used operationally inside target area. AMPANIC-1 has been terminated by JYWAVE FW Branch because of weakness in his personal security, and it is believed best not to contact him on this matter if possible.
